

Table of Contents

SUMMARY	1
I. Introduction	I-1
II. Further developments of the nuclear accident since that time	II-1
1. The Tohoku District-Off the Pacific Ocean Earthquake and the resulting tsunamis	II-1
(1) Investigation of the causes due to the occurrence of the earthquake and tsunamis	II-1
(2) Restoration and reconstruction status from general disaster	
2. Situation of the accident at the Fukushima NPSs, etc.	II-41
(1) New findings regarding the occurrence and development of the accident at the Fukushima Dai-ichi NPS	II-41
(2) Conditions of the Fukushima Dai-ichi NPS	II-121
(3) Situation of Fukushima Dai-ni Nuclear Power Station	II-220
(4) Situations at other NPSs	II-293
(5) An outline of the development of events at Fukushima Dai-ni NPS and other power stations	II-379
3. Response regarding the nuclear emergency	II-385
(1) Efforts to enable temporary access into restricted areas	II-385
(2) Implementation status of deliberate evacuation	II-386
(3) Establishment of specific spots recommended for evacuation	II-386
4. Situation of the release of radioactive materials	II-389
(1) Evaluation of the amount released into the atmosphere from the NPS	II-389
(2) Preventive measures against sea contamination and sea area monitoring	II-401
5. Radiation exposure situation	II-413
(1) Situation of exposure for workers	II-413
(2) Efforts to estimate the exposure received by residents in the vicinity	II-426
6. Responses to agricultural products, etc.	II-430
(1) Provisional regulation values regarding radioactive materials in food	II-430

(2) Inspection plan, restriction of distribution and restriction of consumption	II-430
(3) Response to each item	II-431
(4) Handling of fertilizers, etc.	II-433
III. Efforts to bring the accident under stable control	III-1
1. Roadmap towards restoration from the accident at TEPCO’s Fukushima Dai-ichi NPS (the “Roadmap”)	III-1
(1) Evaluation of Step 1	III-1
(2) Issues in Step 2	
2. The treatment of contaminated water	III-19
3. Radiation control and medical care, etc.	III-20
IV. Immediate actions to assist residents affected by the nuclear accident (Actions in off-site)	IV-1
1. Roadmap for immediate actions to assist residents affected by the nuclear accident	IV-1
2. Initiatives to lift the “Evacuation-Prepared Area in Case of Emergency” designation	IV-2
(1) Policy governing initiatives	IV-2
(2) Radiation monitoring to enable lifting of the Evacuation-prepared Area in Case of Emergency designation	IV-4
3. Preparation of maps indicating radiation doses etc.	IV-20
4. Measures for decontamination and waste, etc.	IV-26
(1) Comprehensive response to contamination by radioactive materials	IV-26
(2) Act on Special Measures concerning Handling of Radioactive Pollution	IV-26
(3) “Basic Concept for Pushing Ahead with Decontamination Works” and “Basic Policy for Emergency Response on Decontamination Works”	IV-28
(4) Specific efforts towards carrying out monitoring and decontamination	IV-29
(5) Handling of disaster wastes, etc.	IV-34
V. Plans for the NPS site after restoration from the accident (On-site plans)	V-1

1. Efforts to address mid-term challenges	V-1
2. Efforts to address long-term challenges	V-1
VI. Situation regarding efforts to address lessons learned (28 items)	VI-1
VII. Consideration for strengthening standards and other matters	VII-1
1. Efforts being made by the Nuclear Safety Commission (NSC)	VII-1
(1) Presentation of advice and basic policy by the NSC	VII-1
(2) Review on Regulatory Guides, etc.	VII-5
(3) Responses towards severe accident countermeasures	VII-9
2. Efforts made by the Nuclear and Industrial Safety Agency (NISA)	VII-10
VIII. Additional Safety Assessment Efforts at NPSs	VIII-1
1. Confirmation of the state of implementation of emergency safety measures	VIII-1
2. Implementation of safety assessments based on stress tests	VIII-4
IX. Conclusion	IX-1

Note: Evaluation in this report is preliminary and based on the facts gleaned about the situation so far.
