

Summary

This summary provides the number of manufacturing establishments and the value of shipments by commodity from establishments with four or more employees, as well as their ranking by prefecture, out of the results of “the Census of Manufacture 2013” carried out as of December 31, 2013.

1. The number of manufacturing establishments

In terms of the number of manufacturing establishments, the commodity category “Offset printing for paper” accounts for the largest number, followed by “Miscellaneous fabricated plate and sheet metal products”, “Miscellaneous processed foods”, “Fresh concrete”, “Miscellaneous fabricated construction-use metal products”, “Parts, fittings and accessories of metal working machines”, “Japanese-style pastries and cakes”, “Stamped and pressed machinery parts, without machine finishing”, “Plastic products for automobiles”, and “Miscellaneous seafood products”. This suggests firms related with fabricated metal products and food products are showing up at the top of the list.

As for location, Tokyo, Osaka, and Aichi have a lot of plants belonging to “Offset printing for paper”, which suggests that these three prefectures occupy a little more than 30% of the total. Aichi, Osaka, and Kanagawa have many plants in the “Miscellaneous fabricated plate and sheet metal products”, accounting for almost 30% of the total (Table 1).
