VALUES AND CHALLENGES OF THE REALIZATION OF CARGO eVTOL

Bell Helicopter/Yamato Holdings Co., Ltd.
16 November, 2018

Passenger and Cargo: a Different Application

**Bell and Yamato believe:
cargo eVTOL to be utilized in
civilian market requires both
AIRWORTHINESS and
GROUNDWORTHINESS equally.**

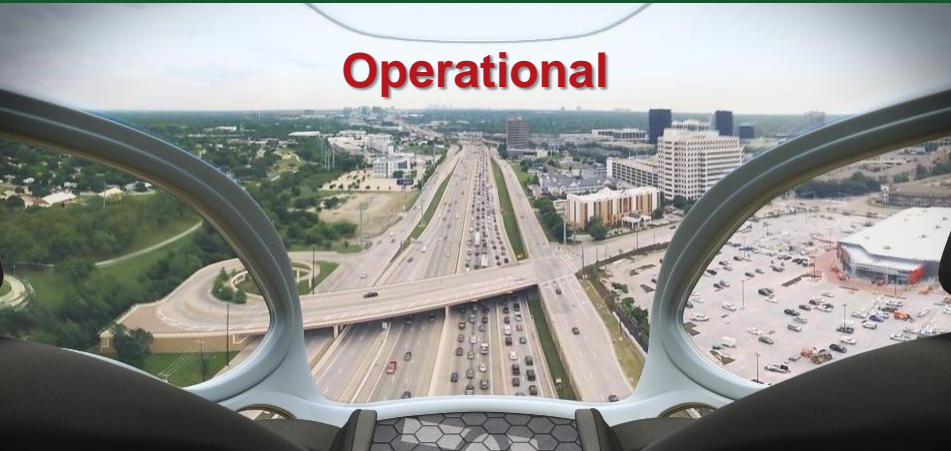

Towards a Collaborative Innovation

For our collaboration on the development of the cargo eVTOL system, Bell will develop the aircraft, while Yamato creates the detachable pod. This will enable us to pursue both airworthiness and groundworthiness simultaneously.

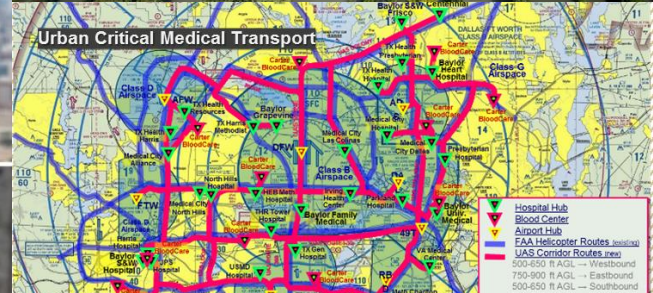

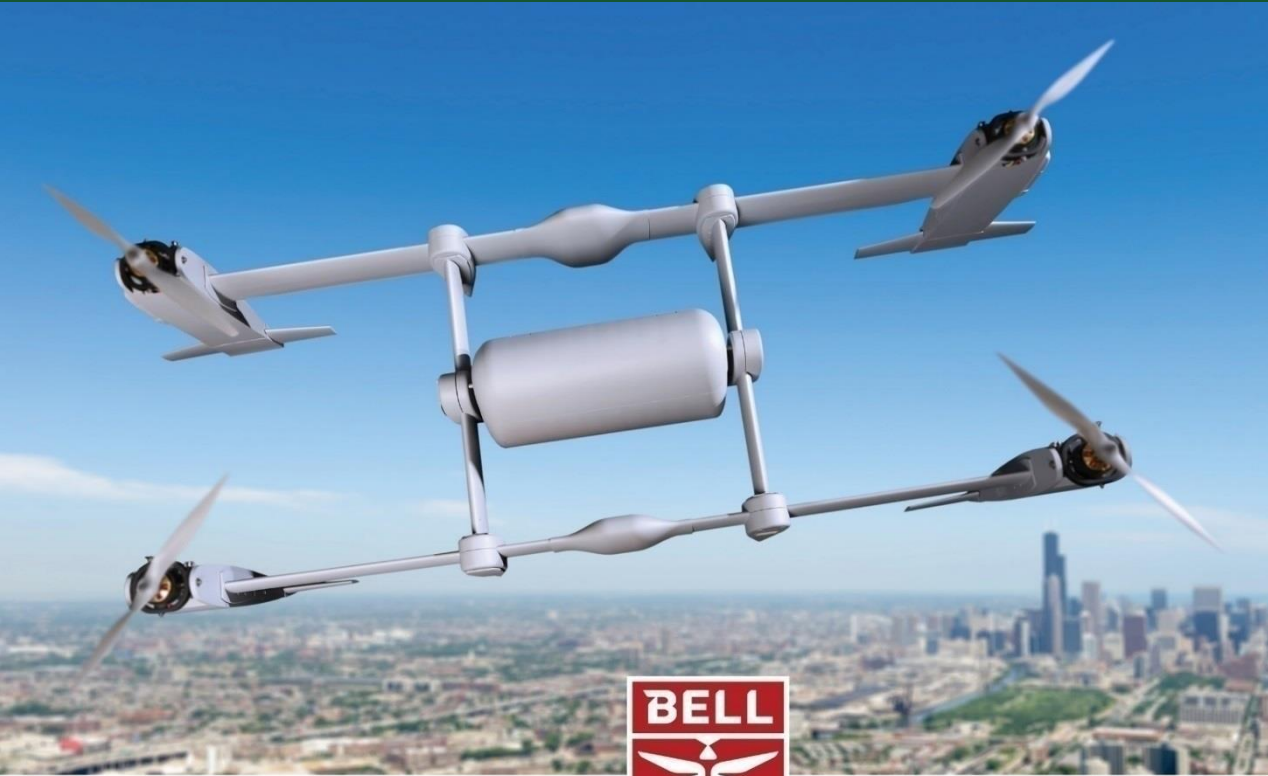

This system should become a revolutionary mode to provide constant transportation, which other existing vehicles could never have achieved.
