2. The definition of survey items

(1) Product

1) Production

The quantity of products actually produced (including produced or processed as a consignee) by the establishment that is the object of the survey (hereafter, 'the survey object'). However, 'products in process' shall be excluded.

Besides, 'Production' includes products as process goods or for consumption for other products in 'the survey object'.

2) Reception

The quantity of products received by the factories or warehouses of 'the survey object' that produces the same survey commodity items due to the following circumstances:

- a. Purchase from other enterprises (including imports)
- b. Reception from other factories belonging to the same enterprise
- c. The commissioned products and commission-manufactured products received from the consignees (including subcontracted factories)
- d. Returned products

3) Consumption

The quantity of products consumed as materials, process goods and fuels in 'the survey object'

4) Shipment

The quantity of products actually shipped from 'the survey object's' warehouse or rental warehouse which 'the survey object' mainly uses

Besides, the quantity of products is distinguished as 'Sales' or 'Other' in the following ways:

- b. Products shipped to the headquarters/sales offices or relay points for the purpose of selling
- c. Commissioned products shipped to consigners that are sales dealers (including consumers)
- d. Products shipped to other factories of the same enterprise which are not producing the same survey commodity

(Other)

- a. Products shipped to other factories of the same enterprise which are producing the same products as the survey commodity
- b. Products shipped to other factories of the same enterprise as materials
- c. Products shipped as materials for use in the commissioned products or commission-manufactured products
- d. The commissioned products or commission-manufactured products shipped to the manufacturers (consigners) that are producing the same survey commodity

- f. Products consumed in-house (only in the case of the no consumption survey item)

(Sales Value)

Value as evaluated by the contract price or producer's selling price

In this case, 'contract price' or 'producer's selling price' are the enterprise's selling prices excluding shipping charges, transport costs, insurance costs and other costs, and including consumption tax.

5) Inventory at the end of the month

(3) Production Capacity

All facilities or production capacity under the survey actually owned by 'the survey object'

(4) Labor

Number of persons engaged at the end of month

The number of employees that actually and regularly engages in production, management or other operations (including the dispatched workers)

3. Concerning classification in fiber composition of fiber products in this monthly book

(1) Pure yarn and pure woven fabrics, follow the standards of the Household Goods Quality Labeling Law. Accordingly, when the ratio of mixing or mixed use of other fiber is 3% or less for worsted yarn (yarn, knit goods, woven fabrics) , 5% or less for woolen yarn (yarn, knit goods, woven fabrics) and 1% or less for fibers other than wool, they are pure (yarn, knit goods, woven fabrics)

Further, for mixing or mixed use of other fibers contained in fancy yarn, when the ratio of stripe yarn is 7% or less of the total weight of the woven fabrics, it is treated as a pure woven fabrics, and in the case of blankets, this is decided according to the component fibers of the weft regardless of the component fibers of the warp.

(2) From 2004, the names of blended yarn and blended yarn fabrics are used when there are two or more kinds of fiber (regarding synthetic fibers, if two or more synthetic fibers are used, the total weight). The item will be named after the fiber with the greatest weight ratio, and if the weight ratios of the fibers used are the same, it will be named in the order of wool, silk, flax, synthetic fiber, acetate, cuprammonium rayon (bemberg), cotton and viscose.

(3) Regarding synthetic fiber blended yarn and mixed synthetic fiber fabrics, if the weight ratios of synthetic fibers are different, fibers with greater weight ratios will be graded, and if weight ratios are the same, grading will be done in the order of polyester, nylon, acrylic, vinylon, and others (including vinylidene, polyvinyl chloride, polyethylene, polypropylene and polyurethane).

(4) The classification into filament fiber fabric and staple fiber fabric is done according to whether the contents of the fibers graded in the above-mentioned way are mainly filament fiber or spun yarn.

When the ratios of filament fiber and staple fiber are the same, the textile is treated as a filament fiber fabric.

4. Others

(1) Abbreviations used in this monthly report are as follows:
