

The Outline of the opinions for ALPS treated water

23 October, 2020

**Secretariat of the Team for
Countermeasures for Decommissioning
and Contaminated Water Treatment**

Process towards decision on the handling of the ALPS treated water

- ◇ As the handling of the ALPS treated water may induce negative impact on reputation, the treated water has been stored in tanks for more than six years while experts examined this subject. The ALPS subcommittee's report suggested both vapor release and discharge into the sea as feasible options from the viewpoints of regulation and technology, and discharge into the sea is the more reliable method of implementation.
- ◇ The IAEA acknowledges the subcommittees report as “addresses technical, non-technical and safety aspects necessary to make a decision.”
- ◇ Based on that, the GOJ has been hearing opinions from wide range of parties concerned such as local governments and residents and continued its examination.
- ◇ After considering the report of the ALPS subcommittee and the opinions from parties concerned, **the GOJ will decide its basic policy on handling of the ALPS treated water.**

(1) “Meeting for Hearing Opinions” about the ALPS treated water

- 7 “Meetings for Hearing Opinions” have been held so far in Fukushima Prefecture and Tokyo metropolitan area based on the suggestion by the ALPS Subcommittee.
- 29 groups (43 people) of local concerned parties, local governments, and national groups such as economy, tourism, distribution, and consumers participated.

Main opinions from “Meetings for Hearing Opinions”

- *Concerns for safety of the ALPS treated water
- *Concerns for negative impact on reputation and delay in reconstruction
- *Concerns for the consensus process
- *Proposals for handling of the ALPS treated water and R&D on tritium separation
- *Opinions on discharging into the environment
