

Appendix 1

List of Newly Established and Revised JIS Publicly Notified on November 20, 2020

<Division in charge and telephone number>

International Standardization Division (e-mail: s-kijun-ISO@meti.go.jp direct line: 03-3501-9283)

International Electrotechnology Standardization Division (e-mail: s-iec@meti.go.jp direct line: 03-3501-9287)

1. Newly established standards

Name of standard	JIS code	Association that prepared the draft proposal	Division in charge
Non-destructive testing-Automatic inspection system for inner diameter surface of machining holes-Part 2: Method of testing for performance characteristics of laser inspection system	Z2324-2	Japanese Standards Association	International Standardization Division
Non-destructive testing-Automatic inspection system for inner diameter surface of machining holes-Part 3: Method of testing for performance characteristics of camera inspection system	Z2324-3	Japanese Standards Association	International Standardization Division
Non-destructive testing-Automatic inspection system for inner diameter surface of machining holes-Part 4: Method of testing for performance characteristics of eddy current inspection system	Z2324-4	Japanese Standards Association	International Standardization Division
Wear resistant tools-Terminology	B0178	Japan Cutting & Wear-Resistant Tool Association	International Standardization Division
Mechanical properties of fasteners made of carbon steel and alloy steel-Flat washers with specified property classes	B1061	The Japan Research Institute For Screw Threads And Fasteners	International Standardization Division
Fasteners-Types of inspection documents	B1093	The Japan Research Institute For Screw Threads And Fasteners	International Standardization Division
Recommendation of cemented carbide for wear resistant tools	B4054	Japan Cutting & Wear-Resistant Tool Association	International Standardization Division
Rubber,unvulcanized-Determination of viscosity and stress relaxation using a rotorless sealed rheometer	K6297	The Japan Rubber Manufacturers Association	International Standardization Division
Packaging-Accessible design-Part 1: General requirements	S0021-1	Japan Packaging Institute	International Standardization Division

(Total standards newly established: 9)

2. Revised standards

Name of standard	JIS code	Association that prepared the draft proposal	Division in charge
Information technology-Universal Coded Character Set (UCS)	X0221	Information Processing Society of Japan	International Electrotechnology Standardization Division
Parallel screw threads gauges-Measuring method	B0261	Japan Precision Measuring Instruments Manufacturers Association	International Standardization Division
Calibration and verification of helical compression and extension springs testing machines	B7738	Japan Testing Machine Association	International Standardization Division
Fiber optic interconnecting devices and passive components-Basic test and measurement procedures-Part 2-17: Tests-Cold	C61300-2-17	Optoelectronics Industry And Technology Development Association	International Electrotechnology Standardization Division
Fiber optic interconnecting devices and passive components-Basic test and measurement procedures-Part 2-19: Tests-Damp heat-Steady state	C61300-2-19	Optoelectronics Industry And Technology Development Association	International Electrotechnology Standardization Division
Calibration of fiber optic power meters	C6186	Optoelectronics Industry And Technology Development Association	International Electrotechnology Standardization Division
Electric traction overhead lines-Fittings-Test methods	E2002	Japan Railway Electrical Engineering Association	International Standardization Division
Plastics-Methods of exposure to laboratory light sources-Part 1: General guidance	K7350-1	The Japan Plastics Industry Federation	International Standardization Division
Glossary of terms used in fibre-Part 2: Man-made fibres	L0204-2	Japan Chemical Fibers Association	International Standardization Division
Glossary of terms for drilling equipments and tools	M0103	The Japan Society Of Industrial Machinery Manufacturers	International Standardization Division
Steel pails	Z1620	Japan Steel Drum Association	International Standardization Division
Terms and definitions of nondestructive testing	Z2300	The Japanese Society For Non-Destructive Inspection	International Standardization Division
Recommendation for sports lighting	Z9127	The Illuminating Engineering Institute Of Japan	International Electrotechnology Standardization Division

(Accredited SDO)

Name of standard	JIS code	Association that prepared the draft proposal	Division in charge
Insulated wires for cubicle type unit substation for 6.6 kV receiving	C3611	Japanese Standards Association	International Electrotechnology Standardization Division

Name of standard	JIS code	Association that prepared the draft proposal	Division in charge
Security and resilience-Business continuity management systems-Requirements	Q22301	Japanese Standards Association	International Standardization Division

(Total standards revised: 15)
