# 1 About the Quarterly Survey of Overseas Subsidiaries

## (1) Outline of the Survey

### I Purpose of the survey

The purpose of this survey is to promote flexible policymaking for both the economy and industry, by understanding the dynamic changes in the overseas activities of Japanese companies.

### II Legal basis of the survey

The survey is conducted by the Ministry of Economy, Trade and Industry with approval under the Statistics Act.

### III Date of the survey

The survey was based on the period ending on the last day of June 2022. (The deadline for submitting survey responses for this quarter was August 15, 2022.)

### IV Coverage of the Survey

The survey covers Japanese companies that met all the following criteria as of the end of March 2022: All industries except finance, insurance, and real estate; companies with 100 million yen or more in capital; companies with 50 or more employees; companies with overseas subsidiaries.

This survey also targets overseas subsidiaries of the above Japanese parent companies (including overseas subsidiaries that were established during the term of the survey) that meet all of the following criteria as of the end of the surveyed quarter: manufacturing companies; companies with 50 or more employees; companies with 50% or more of their capital coming from parent companies, including both direct and indirect funds (such as funds provided via local subsidiaries).

### V Method of the Survey

The survey was conducted via mail, using self-declarations submitted by Japanese parent companies.

### VI Survey Items

The survey covers actual figures and Diffusion Index (business confidence) for sales, capital investment, and number of employees.

### VII Response Rate

The responses to the survey for this quarter are summarized below:

Number of companies covered by the survey (overseas subsidiaries)	Number of companies that responded	Response rate <sup>※</sup>
5,439	4,184	76.9%

※Response rate it was calculated by the valid responses

## (2) Notes on Use

### I Adjustments to deal with gaps in reported values

Comparisons between the current quarter and the corresponding quarter of the previous year are calculated and estimated by totaling the figures only for overseas subsidiaries (newly established companies included) continuously subject to the survey since the corresponding quarter of the previous year.

### II Revisions to statistical data

Statistical data for the current quarter are preliminary results. They are revised at the time of publication of the survey report for the next quarter.

Annual revisions are conducted once a year at the time of publication of the survey report for the April-June quarter. Statistical data for the previous year were retroactively revised and fixed.

### III Tabulation method

Data for all companies covered by the survey is tabulated after estimating the results for companies that did not submit responses, based on the following formula in each region and sector (the number of employees given in the previous quarter is used in the case of employees). All items are estimated except the capital investment.

Estimated values for this quarter for companies not submitting data =

Value for the corresponding quarter in the previous year for relevant companies ×

$$\frac{\text{Total values for this quarter for companies that submitted data both this quarter and in the same quarter of the previous year}}{\text{Total values for the same quarter of the previous year for companies that submitted data both this quarter and in the same quarter of the previous year}}$$
