Trends of Indices of Industrial Production(IIP)

- The index of industrial production for February 2015 is 98.9 (down by 3.4% from the previous month), decreased for the first time in three months.
- This is the lowest level since December 2014, 98.7.

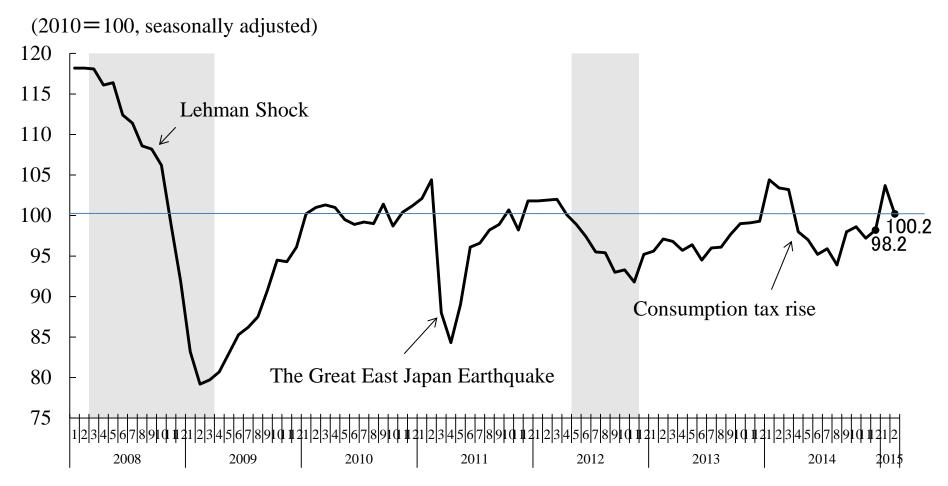

Note: 1. Indices of Industrial Production (IIP) cover mining and manufacturing industry and are published every month. The index is expressed as a percentage of production, shipments, and inventory of mining and manufacturing industry in a base year, currently 2010. IIP indicate the trend of whole mining and manufacturing industry, such as enterprise production activities, supply and demand trends of produced products, etc.

- 2. "×" represent predicted data made from Survey of Production Forecast for March 2015 and April 2015.
- 3. The shadowed portions represent recession periods. The term from May to November in 2012 is provisional.

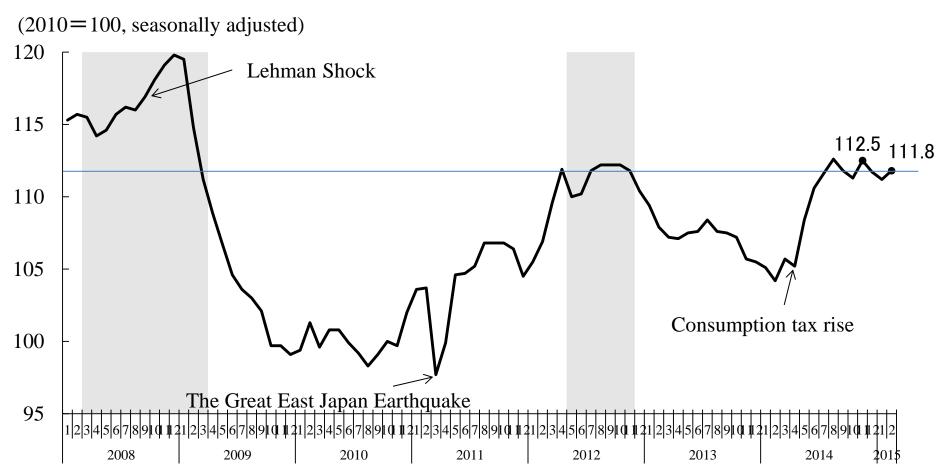

Trends of Indices of Industrial Shipments

- The index of industrial shipments for February 2015 is 100.2 (down by 3.4% from the previous month), decreased for the first time in three months.
- This is the lowest level since December 2014, 98.2.

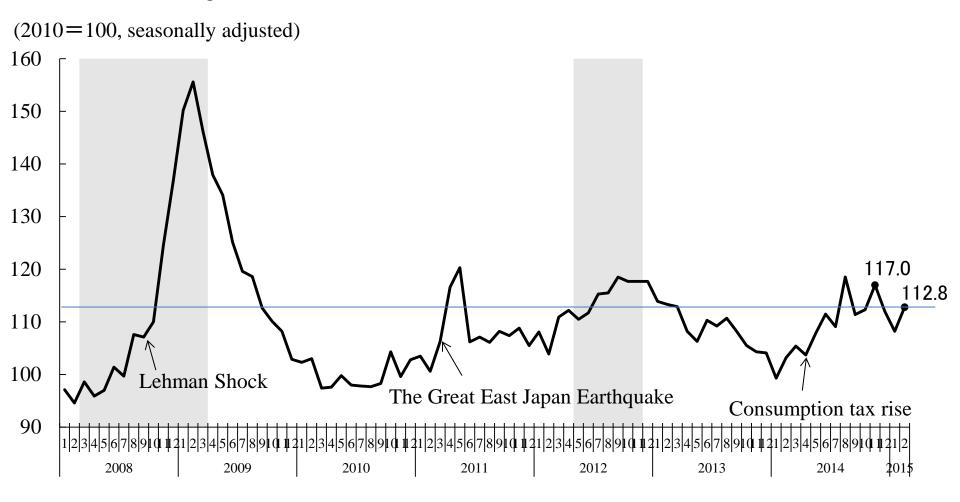

Trends of Indices of Industrial Inventories

- The index of industrial inventories for February 2015 is 111.8(up by 0.5% from the previous month), increased for the first time in three months.
- This is the highest level since November 2014, 112.5.

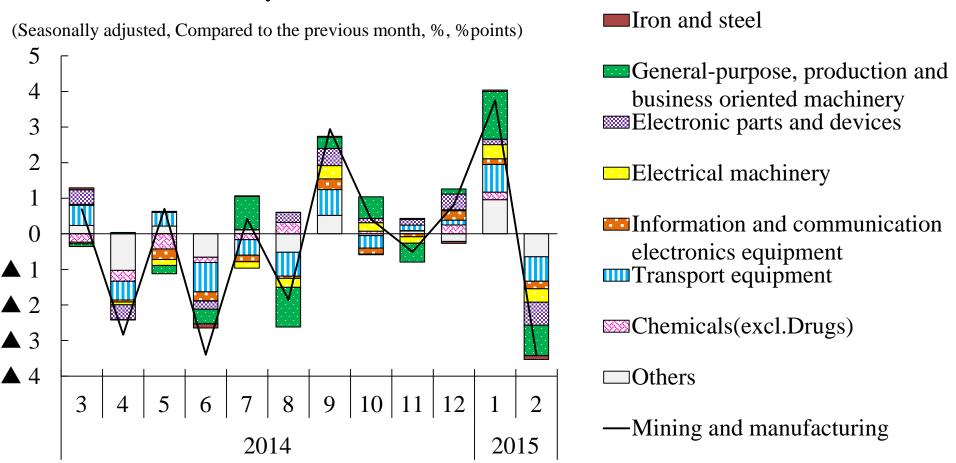

Trends of Industrial Inventory Ratio

- The index of industrial inventory ratio for February 2015 is 112.8 (up by 4.3% from the previous month), increased for the first time in three months.
- This is the highest level since November 2014, 117.0.

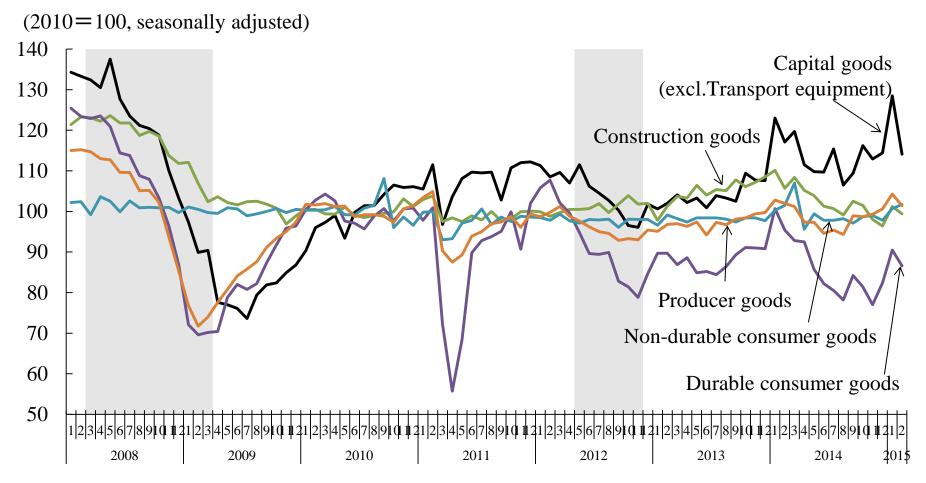

Contribution ratio by type of business of IIP

- The index of industrial production for February 2015 (seasonally adjusted) decreased by 3.4% from the previous month.
- By type of business, production in General-purpose, production and business oriented machinery decreased.

Note: Others includes Non-ferrous metals, Fabricated metals, Ceramics, stone and clay products, Petroleum and coal products, Plastic products, Pulp, paper and paper products, Textiles, Foods, Other manufacturing, and Mining.

Trends of Indices of Industrial Shipments (by type of goods)

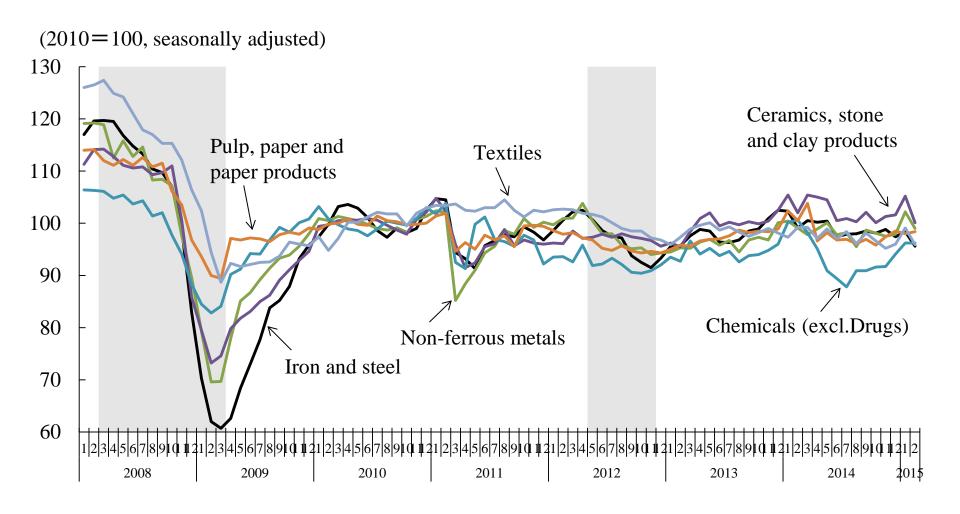

Note: 1. Outline of goods

- ·Capital Goods: products for capital formation including cranes and metal cutting machinery
- ·Construction Goods: products for construction activities including structural steel frames and cement
- •Durable consumer goods: products for consumption by households including television and electric refrigerators

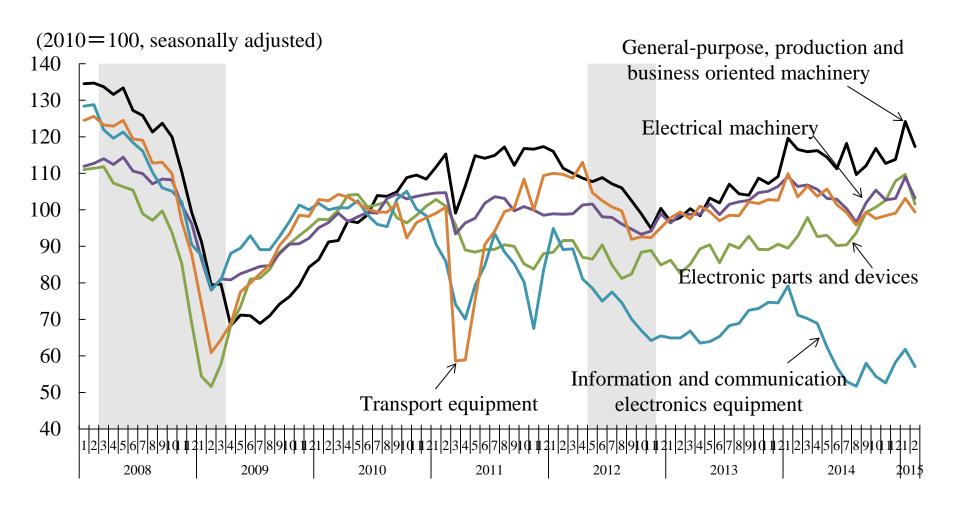

6

- ·Non-durable consumer goods: products for consumption by households including foods and clothes
- ·Producer Goods: products which are input as raw materials
- 2. The shadowed portions represent recession periods. The term from May to November 2012 is provisional.

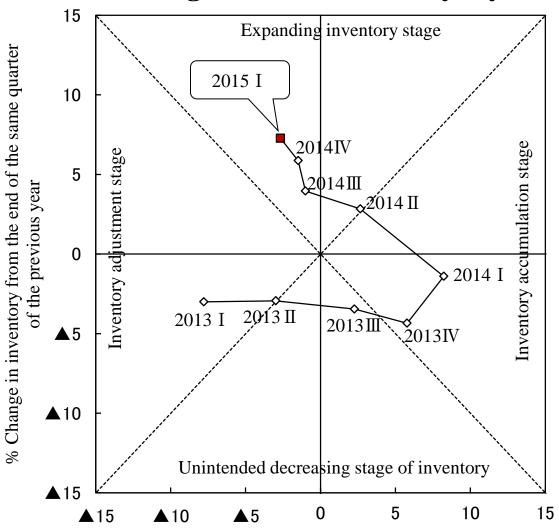

Trends of Indices of Industrial Production for the materials industries

Trends of Indices of Industrial Production for processing industries

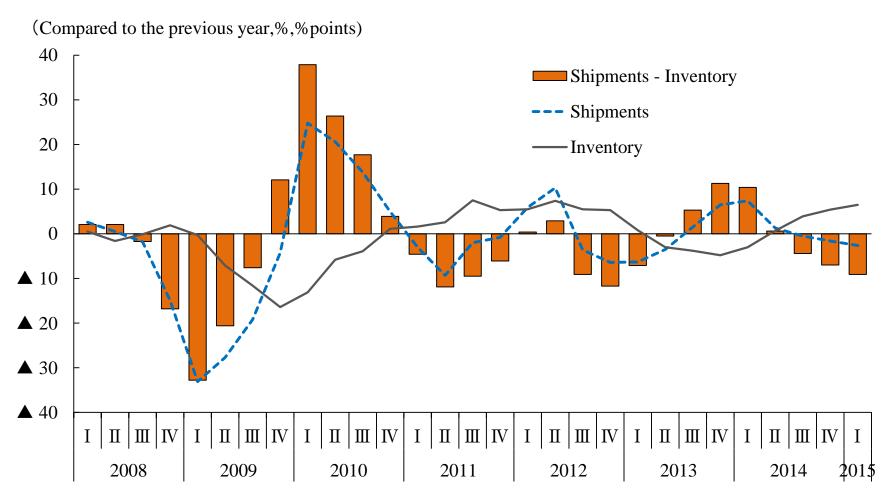

Changes in the Inventory Cycle

% Change in production from the same quarter of the previous year

Note: The data of production for the first quarter of 2015 is the average of January and February 2015. The data of inventory for it is February 2015.

The balance between Shipments and Inventory

Note:

- 1. The balance between Shipments and Inventory = Shipments compared to the same quarter of previous year

 Inventory compared to the same quarter of previous year
- 2. The data of production for the first quarter of 2015 is the average of January and February 2015. The data of inventory for the first quarter of 2015 is the average of January and February 2015.
