ア. 他企業から購入したもの（輸入を含む。）

イ. 同一企業内の他工場から受入れたもの

ウ. 委託生産品及び委託加工品を委託先の工場（下請工場を含む。）から受入れたもの

エ. 返品（戻入れ）されたもの

##### ③ 消 費

調査対象が他の製品の原材料、加工用として消費した数量をいいます。

##### ④ 出 荷

調査対象及び調査対象が契約の主体となって借受けている倉庫又は保管場所から、実際に出荷した数量をいいます。

## 3. Definitions of surveyed items

The definition of each item in the production statistics is as follows.

### (1) Product

#### ① Production

The quantity of products actually produced "including produced as a consignee" by the establishment that is the object of the survey "hereafter, the survey object." However, "products in process" shall be excluded.

Besides, "Production" includes products as process goods or for consumption for other products in "the survey object."

#### ② Reception

The quantity of products received by the factories or warehouses of "the survey object" that produces the same survey commodity items due to the following circumstances:

a. Purchase from other enterprises "including imports"

b. Reception from other factories belonging to the same enterprise

c. The commissioned products and commission-manufactured products received from the consignees "including subcontracted factories"

d. Returned products

#### ③ Consumption

The quantity of products consumed as materials, process goods and fuels in "the survey object"

#### ④ Shipments

The quantity of products actually shipped from “the survey object's” warehouse or rental warehouse which “the survey object” mainly uses

Besides, the quantity of products is distinguished as “Sales” or “Other” in the following ways:

(Sales)

- a. Products directly sold to distributors or other consumer enterprises
- b. Products shipped to the headquarters/sales offices or relay points for the purpose of selling
- c. Commissioned products shipped to consigners that are sales dealers “including consumers”
- d. Products shipped to other factories of the same enterprise which are not producing the same survey commodity

(Other)

- a. Products shipped to other factories of the same enterprise which are producing the same products as the survey commodity
- b. Products shipped to other factories of the same enterprise as materials
- c. Products shipped as materials for use in the commissioned products or commission-manufactured products
- d. The commissioned products or commission-manufactured products shipped to the manufacturers “consigners” that are producing the same survey commodity
- e. Products used in-house “equipment investment for an enterprise's own factory, use for samples, use for gifts, use in testing and research”
- f. Products consumed in-house “only in the case of the no consumption survey item”

(Sales Value)

Value as evaluated by the contract price or producer's selling price

In this case, “contract price” or “producer's selling price” are the enterprise's selling prices excluding shipping charges, transport costs, insurance costs and other costs, and including consumption tax.

#### ⑤ Inventory at the end of the month

The quantity of products produced or received by “the survey object” which are actually stored in “the survey object's” warehouses and rental warehouses which “the survey object” mainly uses.

### (2) Production Capacity

All facilities or production capacity under the survey actually owned by “the survey object”

### (3) Labor

Number of persons engaged at the end of month

The number of employees that actually and regularly engage in production, management or other operations including the dispatched workers.

## 4. Others

- (1) Figures are rounded down to the nearest survey unit, so there may be cases where the totals vs. breakdowns, or yearly totals vs. monthly totals, do not necessarily agree.
- (2) Abbreviations used in this monthly report are as follows.
  - "—" means no results recorded
  - "0" means less than 1 unit after rounding
  - "..." means results are unknown or unsurveyed items
  - "r" means data is revised
  - "x" means data is confidential
  - "▲" indicates a negative number
- (3) When reprinting the statistics contained in this report in other publications, please be sure to note that they are from the "2020 Yearbook of Current Production Statistics, Mineral resources and Petroleum products, Ceramics and Building materials" (Ministry of Economy, Trade and Industry)".
- (4) Continuity coefficients
  - Several goods cannot be compared before and after certain dates due to revisions of some surveyed items. For these goods, it is necessary to multiply the figures before the break date by the connecting coefficients, and then relate these figures to the figures after the break date. For details, please refer to page124.
- (5) This yearbook is published separately from Current Survey of Petroleum Products, Supply and Demand, from 2013. Please refer to the Yearbook of Mineral Resources and Petroleum Products Statistics.
